

Computer Build Presentation Outline 2006

1. Introduction

- a. Introduce the team members and their roles, grade level, school name
- b. Describe how you prepared for the competition

2. State the purpose of the presentation

- a. Describe what you first encountered and the condition of the computer you found
- b. Describe your goal and objectives to accomplish the goal

3. Describe the step-by-step process undertaken

- a. List the main components of each step - use of proper technical terms is the key to a good scoring
- b. Use supporting details and examples
- c. Show how the process relates to the judging criteria

4. Discuss the outcomes, issues, and what was learned

- a. What was the outcome and what did the team accomplish?
- b. What were the main issues faced during the process and how did the team deal with them?
- c. What was learned that could be applied in the future?
- d. What safety issues did your team action on?

5. Summarize the process

- a. What are the key points you want your audience to remember?
- b. Rate individual and team performance
 - what did you do well and what could you have done better?

Other possible items to consider:

- Each team member should include some personal information in their introduction (such as hobbies, interests, etc.)
- Give an example of a real life anecdote
- Use visuals and data to support and to reinforce what you are saying
